

Film application & winding machine

# DH-EF700

## DATA

**This machine is a resist-ink smoothing device.**

**Once you feed a conveyance workpiece into the entry-side conveyor, the machine will automatically perform centering, lamination, resist ink smoothing, and lamination film separation.**

**The temperature sensor is contactless and is designed to eliminate dust generation.**

<Simple Overview>

- Machine dimensions: Approx. (W) 2580 x (D) 1700 (retracted position during prearrangement: 2000) x (H) 1900±30 mm
- Processing speed: 0.3 - 4 m/min
- Workpiece size width: Max. 510 mm
- Supply voltage: Supports various types
